DTF Art Requirements

Artwork should be designed at the desired size.

Scaleable graphics are preferred. These are files that are designed in vector art programs, such as CorelDraw, Adobe Illustrator, Inkscape, etc.

(When using these programs, make sure to convert your fonts/text to objects. Ex. in CorelDraw you would turn your fonts/text to curves. In Illustrator you would turn your fonts/text to outlines. Or you can simply send us the fonts for us to install.)

However, if you design your image in a non vector program, such as Adobe Photoshop or Canva, you can save them as a .tiff or .png. When saving them in this format, you need to save them with a transparent background at 300 dpi (or the highest resolution that gets close to 300 dpi), so that when the image is scaled it prevents it from becoming really pixelated or blurry.

We do offer graphic services, if you need artwork assistance, please call or email for pricing.
